SUMMARY

AI/ML Engineer specializing in production AI systems, Agentic AI, and Retrieval-Augmented Generation (RAG). Experienced in designing end-to-end LLM applications, multi-agent orchestration, hybrid search, workflow automation, and scalable backend services using Python, FastAPI, React, and modern AI infrastructure. Built production-oriented AI solutions spanning healthcare, intelligent job-search automation, and enterprise knowledge systems. B.Tech CSE, Amity University (2022–2026). Based in Mumbai, Maharashtra.

CORE SKILLS

AI / Agentic Systems: LangGraph, LangChain, Agentic RAG, Multi-Agent Systems, Model Context Protocol (MCP), Tool-Calling, LLMs (Llama 3.3, Qwen 2.5), LoRA Fine-tuning, LlamaIndex, Self-RAG, CRAG

Retrieval & Search: Hybrid Search (BM25 + Dense), Cross-Encoder Re-ranking, Semantic Caching, Sentence-Transformers, HuggingFace Transformers

LLMs & Vector Databases: Groq, Ollama, vLLM, OpenAI API, AWS Bedrock, Qdrant, pgvector, Pinecone, MedCPT, DeepSeek-R1/R2, Qwen 2.5/3, Llama 3.x

ML & Evaluation: Scikit-learn, LightGBM, XGBoost, TensorFlow/Keras, MLflow, RAGAS, RapidFuzz, NDCG, Hallucination Detection, Drift Detection, Citation Accuracy, pytest

Full Stack & Backend: FastAPI, REST APIs, React 18, JavaScript, TypeScript, Python, PostgreSQL, MongoDB, DuckDB, Redis, SQLAlchemy, Alembic, Pydantic, Docker, PyWebView

Cloud & Security: AWS, Oracle OCI, GCP, Kubernetes, HIPAA, GDPR, FDA 21 CFR Part 11, AES-256-GCM, OAuth2, JWT, Prometheus, Linux, Git

EXPERIENCE

AI/ML Engineer Intern — MobcoderAI, Noida, UP (Onsite)

Apr 2026 – Jul 2026

- Improved SEC-filing retrieval accuracy from **62%** → **~95%** (NDCG@5) by building a hybrid BM25 + dense-vector search pipeline with Cross-Encoder re-ranking on Qdrant Cloud.
- Reduced query response time to under **5 seconds** across **100+** SEC 10-K/10-Q filings by designing a multi-agent orchestration system in LangGraph with parallel routing on Llama 3.3 70B, using MCP for standardized tool-calling between agents.
- Lowered LLM evaluation costs significantly while maintaining high faithfulness scores by building a deterministic RapidFuzz + PyTorch scoring pipeline tracked in MLflow.
- Reduced terminology errors and eliminated repeat-query latency by fine-tuning Llama 3.1 8B with LoRA and adding Redis semantic caching to a GraphRAG pipeline on AWS Bedrock.

TECHNICAL PROJECTS

RespiRAG — Clinical Precision AI for Oncology (NSCLC) | github.com/SVSPraveen/RespiRAG

Python · FastAPI · React 18 · Qdrant · MedCPT · PostgreSQL · Redis · Groq · Docker · JWT

- Built a governed RAG pipeline over **600+** FDA drug labels and **3,900+** pages of NCCN clinical guidelines, combining HyDE query expansion, MedCPT biomedical embeddings, Cross-Encoder re-ranking, score gating, and an LLM-as-judge verifier to reduce hallucinations.
- Implemented role-sensitive access (Patient/HCP/Admin) with JWT-based RBAC, refresh-token rotation, Redis session blacklisting, and a regex-based guardrail layer against prompt-injection attempts.
- Reduced redundant vector-DB and LLM calls with a Redis citation cache and multi-key Groq rotation with Ollama fallback for graceful rate limiting.
- Built a CI/CD-compatible offline evaluation harness and a document version-control system that flags superseded clinical literature.

SPrav Job AI — Agentic AI Job Application Assistant | github.com/SVSPraveen/SPrav-Job-AI

Python · FastAPI · React 18 · SQLite · Ollama · Groq · PyWebView · Redis · ReportLab

- Designed and built a local-first AI assistant that automates job discovery, evaluates job fit, tailors resumes and cover letters, and prepares human-reviewed application packages using a multi-stage LLM orchestration pipeline.
- Engineered deterministic project selection, AI-generated content verification against a personal knowledge base, encrypted local credential storage (AES-GCM), and hybrid Groq/Ollama inference with graceful fallback.
- Developed a local-first desktop application with background daemon processing, ATS-aware resume optimization, PDF generation, and human-in-the-loop review before submission.

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science & Engineering — Amity University, Uttar Pradesh | 2022 – 2026 | CGPA 7.4

Cloud Certifications: Oracle OCI Multicloud Architect Professional, OCI Networking Professional, OCI Foundation Associate, Google Cloud Computing Foundations

Security Certifications: Cisco Ethical Hacker, IBM Cybersecurity Analyst, Saviynt Identity Security for AI Age
